

Network Aid & Protection

Quality Policy Statement

Network Aid & Protection will carry out the planning, delivery and evaluation of our training provision to ensure it is of high quality and meets the needs of our learners.

Our values and expectations are central to its approach to quality and provide the starting point for setting and evaluating standards. This policy is to establish and maintain an efficient and effective approach to managing the quality of our training.

Although this policy is a clear statement of intent, its successful implementation is vital in meeting the needs of our learners and maintaining learner satisfaction while meeting the requirements of our awarding bodies.

Our aim is to provide high quality training and other learning opportunities that will enable our clients to realise their potential.
